

# 2016 SURFACE MINING REPORT

**For Minerals  
Other Than Coal**

PREPARED BY: ND STATE SOIL CONSERVATION COMMITTEE - BISMARCK, ND

**SUMMARY  
OF  
SURFACE MINING REPORT FOR MINERALS OTHER THAN COAL**

The North Dakota State Soil Conservation Committee was designated by the Legislature to administer the Surface Mining Reports Law, which requires any person conducting surface mining operations for minerals other than coal, to comply with the reporting requirements of Chapter 38-16 (North Dakota Century Code).

The Law requires any person conducting surface mining operations for minerals, other than coal, who, within one calendar year, removes 10,000 cubic yards or more of earthen material or products, including overburden, or affects one-half acre or more, in combined mining operations to report. Minerals included are: cement rock, clay, gravel, limestone, manganese, molybdenum, peat, potash, pumicite, salt, sand, scoria, sodium sulfate, stone, zeolite, or other minerals, but does not include coal.

The Surface Mining Reports Law also requires the State Soil Conservation Committee to prepare and transmit to local soil conservation districts a report giving information about surface mining operations and reclamation activities conducted during the preceding calendar year.

Included in the Surface Mining Report is a list of surface mining operators and their surface mining activities for calendar year 2016.

There were 20 surface mining operators reporting for the calendar year 2016. The following are approximate total operations according to the reports submitted:

1. Acres affected	397	
2. Minerals mined		
A) Gravel & Sand	4,510,555	cubic yards
B) Clay	166,568	cubic yards
C) Scoria	44,059	cubic yards
TOTAL	4,721,182	cubic yards
3. Overburden disturbed	1,145,431	cubic yards

There are 65 pits ranging in size from .5 to 30 acres. Minerals mined were gravel, sand, clay and scoria.
