

Natural Resources Management Employment Resources

Federal jobs

<http://www.usajobs.gov/StudentsAndGrads>

Once you make an account you can actually set job or internship search parameters and whenever a job or internship opens with your criteria you will get an email automatically. All States also have their own job search sites for state government jobs so be sure to check those also.

North Dakota jobs

<http://nd.gov/hrms/jobs/announcements.asp>

These are jobs offered by the North Dakota state government. You can sort by clicking on the column header.

MN Department of Natural Resources

<https://statejobs.doer.state.mn.us/JobPosting>

This is the site for all MN state government jobs, just select "Natural Resources Dept" from the "Department" section for the DNR jobs.

Texas A&M

<http://wfscjobs.tamu.edu/job-board/>

Jobs and graduate study opportunities all over the United States

Environmental career center

<http://environmentalcareer.com/job-board/>

Not as many entry level positions here but still worth looking at especially for grad students.

EcoEmploy

<http://www.ecoemploy.com/>

This website lets you search by job type or by location. When searching by location, such as a certain city or state, it links you to the exact job posting board.

Cyber-Sierra

<http://www.cyber-sierra.com/nrjobs/>

Links to job sites organized by type of career.

Conservation job board

<http://www.conservationjobboard.com/>

Many public and private jobs.

Student Conservation Association

<http://www.thesca.org/>

Good resource for conservation internships for students. They are all good hands on experience and help build teamwork skills.

The Job Seeker

http://www.careerhelp.umn.edu/environmental_jobs.html

This is a website that charges for access to many environmental jobs; however the U of M provides a username and password, the above link, which you can use to look at the job postings.

Ecological Society of America

http://www.esa.org/careers_certification/employment.php

This website has jobs, internships, grants and fellowships, and information on how to become a certified ecologist through the ESA. This certification can be a great addition to your resume.
