Wendy thanks for the invite to the legislative social. I will not be able to attend as we will be harvesting barley. The problem with agriculture that concerns me is the demographics of the farming population that will cause more of a labor shortage than already is occurring. The answer I believe will be in autonomous farm equipment. The lack of farm workers and the low commodity prices doesn't leave many options for us. I hope SBARE has plans to look at this as in 5 yrs it will a big problem.

Rep Dick Anderson
