Name *

Paul J Thomas

Organization (If Applicable)

Please describe your Agriculture and/or Extension needs and potential solution. *

I am a strong proponent of the Livestock Specialist at the NCREC. I do not produce any livestock on my farm, however I recognize the need for a profitable and growing livestock industry in my region to ensure profit on my farm. The lack of livestock in our state has created high transportation costs for our grains and a lack of an outlet for off quality grain. There is no work that NDSU Extension could do that would be of more benefit to this state than promoting and aiding the development of livestock operations throughout this state.
