Dear Sarah,

It is with great pleasure that we, Leon Schumacher and Guillermo Scaglia, have organized a proposal for the State Board of Agricultural Research and Education. Our focus is Precision Livestock Farming and we have gained letters of support from the Grand Farm, C-Lock Inc., Meta Farms, and 701x as they too feel that a collaborative research effort is needed for the state of North Dakota and the region. Should you have any questions, please do not hesitate to call! We look forward to meeting and sharing our proposal!

Best regards,

Leon
